Sprint 1 Test Plan: Hope ERP

1. Purpose

To check that the Sprint 1 features of Hope ERP work correctly and follow the user rights.

2. Scope

- In scope: register, login/logout, set/reset password, User Management, permissions (superadmin/admin/user), smoke test
- Out of scope: features planned for later sprints

3. Test Accounts

- Superadmin: acestevenalcantara@gmail.com
- Admin: besamatthew504@gmail.com
- User (registered, not yet approved): [email]
- User (approved): [email]

4. Test Approach

- Manual test cases (TST-02, TST-03)
- Permission matrix testing on the menu, buttons, and server (TST-04)
- Automated smoke test of the login and main page (TST-05)
- Bug reports, then re-test after fixes (TST-06)

5. Environment

- Browser: [e.g., Chrome, version]
- Link: [localhost or test site URL]
- Database: [e.g., MySQL]

6. Roles

Tester: Llabres

7. Acceptance Criteria

- All test cases are executed and recorded as Pass or Fail
- 100% of permission matrix checks pass
- Expired and reused reset tokens are rejected
- Admin cannot see or edit the Superadmin
- The last Superadmin cannot be removed or blocked
- The smoke test passes
- No open Critical or High bugs at the end of the sprint
